MONUMENT VALLEY
Sampled August 2001

DATA PACKAGE CONTENTS

This data package includes the following information:

Item No. Description of Contents

1. **Site Hydrologist Summary**

2. **Data Package Assessment**, which includes the following:

- a. Field procedures verification checklist
- b. Confirmation that chain-of-custody was maintained.
- c. Confirmation that holding time requirements were met.
- d. Evaluation of the adequacy of the QC sample results.

3. **Data Assessment Summary**, which describes problems identified in the data validation process and summarizes the validator's findings.

4. **Suspected Anomalies Report (SAR)** generated by the UMTRA database system. This report compares the new data set with historical data and designates "suspected anomalies" based on the many criteria listed as footnotes on each page. In aggregate, these criteria cause the suspected anomaly program to be very conservative; many of the data shown in the tables are not, in the evaluator's judgment, truly anomalies, but merely natural variations in data or routine changes in laboratory detection limits. The designation "OK" affirms the judgment that the particular entry is not an anomaly and, therefore, requires no further inquiry.

5. **UMTRA Database Printouts**

- a. Ground-Water Quality Data (included on disk)
- b. Equipment Blank Data (included on disk)
- c. Time Versus Concentration Graphs
- d. Water Level Data

6. **Sampling and Analysis Work Order and Trip Report.**

This page intentionally left blank

Site Hydrologist Summary

Site: Monument Valley

Sampling Period: August 2001

SUMMARY CRITERIA

- 1. Did concentrations in water from any domestic wells sampled exceed a ground water standard, primary drinking water standard, or health advisory?**

Domestic wells 200, 201, 625, and 640 were sampled during this event; all analyte concentrations were below ground water standards, primary drinking water standards, and health advisory limits.

- 2. Were standards exceeded at any point-of-compliance wells?**

There are no point-of-compliance wells established at the Monument Valley Site.

- 3. As a result of this sampling round, is there any indication of unexpected contaminated groundwater movement?**

There is no indication of unexpected contaminated ground water movement. Time versus concentration graphs for chloride, nitrate and sulfate from selected wells are provided with the analytical data. Wells with sample concentrations that exceeded UMTRA ground water standards are listed in Table 1.

- 4. Is there statistical evidence that UMTRA Project related contaminants were detected in a surface water body in greater concentrations than upstream ambient water quality?**

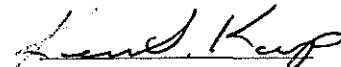

Surface water was not sampled during this event.

Site Hydrologist Summary (continued)

Table 1. Monument Valley Wells with Samples that Exceeded UMTRA Standards in August 2001.

ANALYTE	STANDARD ¹	WELLS EXCEEDING STANDARDS (CONCENTRATION ¹)
Nitrate	44.27	606 (813), 648 (330), 649 (877), 653 (194), 655 (455), 656 (167), 669 (63.7), 761 (91.2), 762 (159), 764 (153), 765 (629), 770 (141), 771 (681), 777 (777), 778 (572)
Uranium	0.044	774 (0.0645)

¹Units are in mg/L

UGW Water Sampling Field Activities Verification Checklist

Project Monument Valley
Date(s) of Verification 2-28-02

Date(s) of Water Sampling August 6 to August 8, 2001
Name of Verifier Sam Campbell

1. Is the SAP the primary document directing field procedures?

List other documents, SOP's, instructions.

2. Were the sampling locations specified in the planning documents sampled?

3. Was field equipment calibrated as specified in the above named documents?

Were the number and types (alkalinity, temperature, Ec, pH, turbidity, DO, ORP) of field measurements taken as specified?

Were the standard solutions used for the calibration and operational checks of the field instruments brought to within 10 degrees C of the temperature of the water to be sampled?

Was the calibration information recorded on the field data sheets?

4. Was depth to water measured before purging?

Was this information used to calculate purge volume?

5. If conventional purging was used, were the wells purged until parameters stabilized and 3 casing volumes were removed, until the well was purged dry, or until 10 casing volumes were removed?

6. If low-flow purging was used, was the purge rate less than 0.125 gal/min, was the drawdown less than 0.3 ft, and was the low-flow purge volume removed prior to sampling?

**Response Comments
(Yes, No, N/A)**

Yes

Sampling work order dated 7-9-01

Yes

Yes

ORP op check reading too low at many locations

16

Yes

Yes

Yes

Yes

Yes

Except pH was not stable at well 650; conductivity was not stable at well 761; purge not required at domestic wells

Yes

Except low flow purge volume was not removed at well 657

7. Were duplicates taken at a frequency of one per 20 samples? Yes
8. Were equipment blanks taken at a frequency of one per 20 samples that were collected with nondedicated equipment? Yes
9. Were trip blanks prepared and included with each shipment of VOC samples? NA
10. Were QC samples assigned a fictitious site identification number? Yes
Was the true identity of the samples recorded in the field notes? Yes
11. Were samples collected in the containers specified? Yes
Were certified pre-cleaned containers used for the sampling? Yes
12. Were samples filtered and preserved as specified? Yes
13. Were the number and types of samples collected as specified? Yes
14. Were chain of custody records completed and was sample custody maintained? Yes
15. Were sample ticket book numbers recorded on field data forms and on the chain of custody? Yes
16. Are field data sheets signed and dated by the team leader? Yes
17. Was all other pertinent information documented on the field data sheets? Yes
18. Was the presence or absence of ice in the cooler documented at every sample location? Yes Except at well 619
19. Were water levels measured at the locations specified in the planning documents? Yes

REVIEWER COMMENTS:

② mg K, Na, and Sr detected in the prep blank - no samples affected. ③ mg K, Na, and Sr detected in CCRs - no samples affected. ④ Cl detected in CCRs - no samples affected

ITEMS REQUIRING ATTENTION:

① J flag all gross alpha resys/its because of matrix spike recovery. ④ U flag SO₄ result 280264 because of CCR contamination

MONUMENT VALLEY, AZ
AUGUST 2001 SAMPLING EVENT
DATA ASSESSMENT SUMMARY

The DOE-GJO Analytical Laboratory analyzed samples and reported results for this sampling event under requisition number 17567 for the UMTRA ground water project.

METALS/MAJOR CATIONS ANALYSIS

Calcium magnesium, manganese, potassium, sodium, strontium, and vanadium were analyzed using inductively coupled plasma-atomic emission spectrometry (ICP-AES). Cadmium and uranium were analyzed by inductively coupled plasma-mass spectrometry (ICP-MS), and selenium was analyzed by hydride generation atomic absorption spectrometry (NaBH_4). Data validation qualifiers were not required for these analyses.

INORGANIC ANALYSIS

Chloride, nitrate, and sulfate were determined by ion chromatography (IC), and ammonium was determined by spectrophotometry (colorimetry). TDS was determined gravimetrically.

The sulfate result from one of the equipment blanks (280264) was qualified with a "U" (nondetect) flag in the database because of continuing calibration blank contamination.

RADIOCHEMICAL ANALYSIS

The determination of gross alpha was performed using gas proportional counting (PC). Although not requested, gross beta results are included in this report because gross beta activity is determined concurrently with gross alpha activity. Radium-226 and radium-228 were analyzed by liquid scintillation spectrometry (LSc).

Values less than the minimum detectable activity (MDA) and/or the 3-sigma counting statistic range were qualified with a "U" flag in the database, as shown on the Ground Water Quality Data by Parameter printout.

The gross alpha result from well 201 was qualified with a "J" flag in the database because the matrix spike recovery did not meet criteria.

FIELD ANALYSIS/ACTIVITIES

Results from wells 619, 657, 775, and 776 were qualified with an "F" flag in the database indicating these wells were purged and sampled using the low-flow method. Results from wells 403, 602, 606, 655, 669, and 764 were qualified with a "L" flag in the database indicating that less than three casing volumes were removed prior to sampling.

Two equipment blanks were collected for the 32 locations where samples were collected using non-dedicated equipment. The equipment blanks were analyzed for the same constituents as the Monument Valley environmental samples. There were no UMTRA related contaminants detected in the equipment blank in concentrations above the contract-required detection limit (CRDL); therefore, equipment blank results are considered acceptable.

Three field duplicates were collected for the 34 sampled locations. Duplicate samples were collected from wells 604, 648, and 776. There are no established regulatory criteria for the evaluation of field duplicate samples; therefore, EPA guidance for *laboratory* duplicates (which is conservative for field duplicates) was used to assess the precision of the field duplicates. Duplicate sample results met the laboratory duplicate criteria (20 relative percent difference) and are considered acceptable.

The oxidation-reduction potential (ORP) measurement at well 648 was qualified with an "R" flag in the database because of a failed operational check.

SAR

Values listed in the SAR were considered valid if: (1) identified low concentrations were the result of low detection limits; (2) the concentration detected was within 50 percent of historical minimum or maximum values; or (3) if there were less than 5 historical results for comparison. All results listed in the SAR met the above criteria and are considered valid.

The chloride result from well 655 and the nitrate result from well 774 from the February 2001 sampling event were listed in the February 2001 data validation package as potentially anomalous. These results were listed on the Anomalous Data Review Checksheet and were designated for comparison to results from this sampling event to make a final determination of validity. As a result of this comparison, these results were considered anomalous and were qualified with an "R" flag (unusable) in the database.

SUMMARY

All analytical quality control criteria were met except as qualified on the Ground Water Quality Data by Parameter and equipment blank database printouts. The meaning of data qualifiers is defined on the UMTRA data base printouts or defined in the USEPA Contract Laboratory Program Statement of Work for Inorganic Analysis, Multi-Media Multi-Concentration, Document Number ILMO2.0, 1991. All data in this package are considered validated and may be treated as final results.

An electronic copy of the analytical data with the qualifiers incorporated is included with this data validation package.

Error Type Flags : 2 - All time high detection limit
 3 - Too low (non-trend approach)
 4 - Too high (non-trend approach)
 5 - Too low (trend approach)
 6 - Too high (trend approach)

Flags : I - Increased detection limit due to required dilution.
 L - Less than three bore volumes removed before sampling.
 J - Estimated value.
 H - Hold time expired, value suspect.

ATTN: Donald Metzler

SUBJECT: Contract No. DE-AC13-96GJ87335—August 2001 UMTRA Ground Water Sampling at Monument Valley, Arizona

Dear Mr. Metzler:

Attached are the map and tables specifying the sampling locations and analytes for routine monitoring at the Monument Valley, Arizona, UMTRA site. Water quality data will be collected from monitor wells at this site as part of the routine UMTRA Ground Water sampling that is scheduled to begin the week of August 6, 2001.

The following lists show the monitor well and domestic well locations (with the associated zone of completion) that will be sampled during this monitoring event.

Ground Water Project Monitor Well (filtered)*

403 Al	619 Dc	655 Al	669 Al	764 Al	770 Al	775 Dc
602 Al	648 Al	656 Al	760 Al	765 Al	771 Al	776 Dc
604 Al	649 Al	657 Dc	761 Al	767 Al	772 Al	777 Al
605 Al	650 Al	662 Al	762 Al	768 Al	774 Al	778 Al
606 Al	653 Al					

Domestic Wells

200 Al 201 Nr 625 Dc 640 Al

*NOTE: Al = Alluvium; Dc = DeChelly Member of the Cuter Formation; Nr = No recovery for classification

QA/QC samples will be collected as directed in the *Sampling and Analysis Plan for the UMTRA Ground Water Project*. Samples collected for alkalinity will be both filtered and unfiltered. Access for the Monument Valley site is covered under the cooperative agreement. Water level information will be collected from sampled wells. Monitor well inspections will be conducted and documented to confirm the status of all sampled wells.

CONTROL NO.: 3100-N/A

MEMO TO: Sam Marutzky

FROM: Daniel L. Sellers *LCR for*

DATE: August 23, 2001

SUBJECT: Trip report for UMTRA water sampling at the Monument Valley site.

Site: Monument Valley, Utah

Dates of Sampling Event: August 6 through August 8, 2001

Team Members: Tony Franzone, Jeff Price, Steve Back and Joe Trevino

Number of Locations Sampled: A total of 34 ground water locations were sampled (30 monitor well locations and 4 domestic well locations).

Locations Not Sampled/Reason: None

Field Variance: Wells 655, 669, 764, 403, 606, and 602 were purged dry prior to removing 3 casing volumes.

Location Specific Information: Roots were encountered in the bottom of well 774.

Well 619 may have a bad check valve; the water level in the flow cell lowered between cycles.

The water in well 768 was gray in color and had an organic odor.

The Eh reading at well 648 may be questionable. When doing the op-check on the next well the Zobel value for Eh was -401.

Quality Control Sample Cross Reference: The following is a list of quality control samples and their assigned false identifications:

False ID	True ID	Sample Type	Associated Matrix	Ticket Number
1100	0776	Duplicate	Ground Water	NDN 642
1101	0604	Duplicate	Ground Water	NDN 645
1300	0605	Equipment Blank		NDN 650
6481	0648	Duplicate	Ground water	NDS 312
7640		Equipment Blank		NDS 318

RECORD

Sam Marutzky
August 23, 2001
Page 2
Control No.: 3100-N/A

Requisition Numbers Assigned: LTSM samples were assigned to requisition 17567.

Water Level Measurements: Water level information was collected at all sampled wells.
